

INSTRUCTIONS

- Every stallion owner must report all mares bred to his stallion during the year. The reports must be filed promptly at the end of the breeding season, but not later than November 1st.
- A separate report must be made for each stallion each year.
- All mares bred (not just those in foal) must be listed, with the names of the owners of the mares, and the first and last dates of service.
- The stallion owner shall give a completed, signed Breeding Certificate giving the first and last dates of service to the owner of each mare bred.
- **Foals will NOT be eligible for registration unless both the Stallion Report and Breeding Certificate are on file at Canadian Livestock Records Corporation.** The dates and signatures on the two documents must correspond.
- If a mare is covered by more than one stallion during the breeding season, Breeding Certificates giving the first and last dates of service by both stallions must be provided.
- If a mare is covered by more than one stallion during the same heat period, the parentage of the resulting foal shall be determined by DNA at the breeder's expense.
- When a stallion is pasture bred to a mare, the stallion owner is required to furnish a statement certifying that there was no other stallion in the vicinity which could have covered the mare and giving the date the mare was placed in the pasture with the stallion as well as the date they were separated.
- When a stallion is leased, a lease application must be filed with the Canadian Livestock Records Corporation.
- For registered mares, which are not CWHBA registered or entered, please attach a copy of the Certificate of Registration.
